Improving risk management through advanced EMV Transaction Authorization

Ecoscard has created EMV Transaction Authorization to provide a low impact, low risk yet comprehensive solution to EMV authorisation processing. EMV Transaction Authorization performs the EMV-specific processing, leaving the existing system to handle card, account and funds checks.

▶ Funcionalidades

- ARQC Verification
- ARPC Generetaion

▶ Específicações

- VISA VSDC 1.3.2 -1.4.0,
- Mastercard M/Chip 2 - 4
- EMV CCD standard

PC
DVD
